Dave Van Houten
6462 N Hwy 59
Merced, CA 95348

Dear Dave,

We are extremely grateful to you for introducing us to an environmentally safe, non-flammable parts washer. For years we have been concerned about fire and explosion hazards in our welding shop when using mineral spirits to clean parts. There appeared to be no good alternative, until we tested ZYMO- "The Parts Washer" last week. The cleaning ability and rust inhibition of the "Surfzyme with Rust Inhibitor" degreaser was excellent. We experienced no flash-rusting problems.

These are the reasons we called you back the same day to order a ZYMO parts washer. We would recommend ZYMO "The Parts Washer" to any welding shop.

Thanks again for introducing us to ZYMO.

Sincerely,

Kathy Weeden
President
